PROFILE

As a highly skilled and motivated software engineer with 1 year of industry and 4 years of academic experience, I specialize in creating robust software solutions using multiple academic programming languages, including a strong focus on c#. Passionate about addressing real-world problems, I bring a proven track record of delivering high-quality software products on time and within a budget.

WORK EXPERIENCE

Freelance Software Engineer - HDesignEmporium   **April 2022 – Present**

- Utilize a diverse skill set in Python, HTML, CSS to develop customized software solutions that meet client specifications.
- Maintain proactive and transparent communication with clients throughout the project lifecycle, providing regular updates on progress, challenges, and solutions.
- Take ownership of projects and manage tasks efficiently to meet deadlines and deliver work within budgetary constraints.
- Collaborate with clients and team members to identify and address any issues or roadblocks, ensuring timely resolution and project success.
- Take ownership of projects and manage tasks efficiently to meet deadlines and deliver work within budgetary constraints.
- Developed a c# and unity-based game, showcasing strong skills in C# and object-oriented programming.
- Utilized Python, Html, CSS and javascript for various projects, showcasing a versatile skill set to c# development.
- Maintained proactive communication and efficient project management to deliver work within constraints.

Data Analyst - Waltonbridge LTD

February 2023-November 2023

- Contribute to the database management process by inputting and validating client information, ensuring the accuracy and consistency of data.
- Collaborate with team members to identify and implement process improvements, enhancing data input and management efficiency.
- Perform accurate data input and ensure data integrity by meticulously reviewing and verifying information for completeness and accuracy.

PROJECTS COMPLETED

- Mad Mamba Run: Developer a c# and unity-based game, available on google play store. This project demonstrates my capability in c#
- Client Website: Developed a professional and visually appealing website using WordPress for a client based in the USA, ensuring an intuitive user experience. (https://theaestheticapp.online/)
- Blockchain Project: Developed a small blockchain project using Python. The project involved generating and processing a limited set of data to produce an outcome comprising ten different data entries within the blockchain.
- Created a Shopify website for a clothing line, delivering an engaging online platform that showcases the products and enables seamless e-commerce functionality. (www.disxplne.com).

EDUCATION & QUALIFICATIONS

Manchester Metropolitan University: BSc (Hons) Software Engineering   2018 - 2022
